

SOIL SCIENCE NIGERIA

MASDAR are seeking a very senior soil scientist for a 6 month assignment in Nigeria starting March/April 2010. The successful candidate will provide technical advice to the Federal Ministry of Agriculture on the methodology, procedures and standards to be adopted in the acquisition and analysis of soil samples for a major nation-wide soil survey. He/she will also provide quality control and ensure uniformity amongst the contractors acquiring and analysing the samples.

This is a very senior position and only those with extensive relevant experience should express interest by sending their CVs to jenny@masdar.com.
